E-TYPE

A BRIEF HISTORY...

In light of Jaguar's success in the Le Mans 24 hour races throughout the 1950s, the company's racing department was given the brief to build a road going sports car, replacing the XK150, using D-Type style construction.
Concept cars were released in 1957 (E1A) and in 1961, the first Jaguar E-Type was unveiled to the public as a two-seater coupé grand tourer (FHC or Fixed Head Coupe) convertible (OTS or Open Two Seater). A 2+2 version with a lengthened wheelbase was later released.

More recently...
Commercial manufacture of the E-Type ceased in 1974 with the black V12 roadster HDU 555N. However, in 2015, Jaguar announced their intention to build 6 new lightweight racing E-Types, to complete the originally intended production of 18 cars, following the exact specifications of the aluminium-bodied original car, including the 3.8-litre 6-cylinder engine.

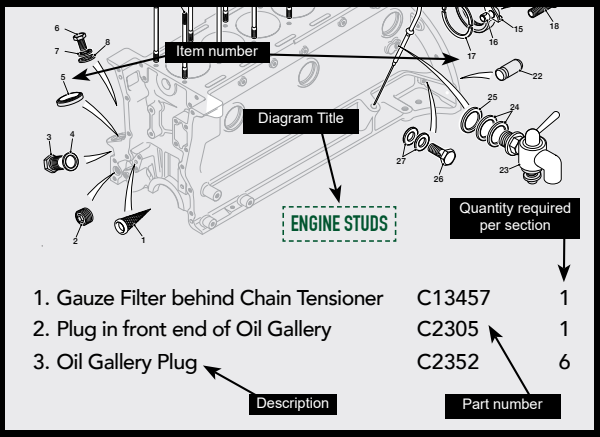

HOW TO USE THIS CATALOGUE

This extensive catalogue documents the wide range of E-Type V12 parts that SNG Barratt stock, manufacture and develop. You will find both original equipment and new, uprated parts throughout and each part can be identified using the simple method below.

Use the illustration in each section to identify the component that you require. Note the indicated item number and find the corresponding number in the section listing. There you will see our part number for that item, the item description, and to its right, the quantity required per car. Very often this will be the original Jaguar part number, thus allowing you to refer to an original factory parts catalogue if more detail is required.

We have documented all of the original Jaguar part numbers and the majority are available to order, however some parts that we have listed are no longer available and are there purely for reference purposes and to aid parts searches. Our easy-to-use on-line Parts Finder allows you to search for items using the part number, enabling you to see photographic images of any items you may wish to purchase before buying.

NOTE USEFUL ABBREVIATIONS USED THROUGHOUT:

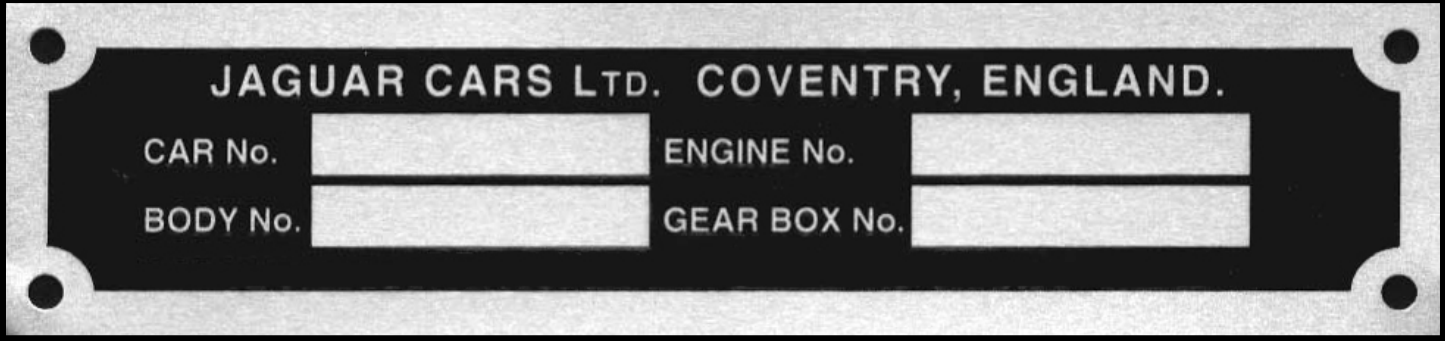

LHF / RHR	LEFT-HAND FRONT / RIGHT-HAND REAR
LHD / RHD	LEFT HAND DRIVE / RIGHT HAND DRIVE
NLA	NO LONGER AVAILABLE
NSS	NOT SOLD SEPARATELY

YOUR CUSTOMER & VEHICLE DETAILS

Please complete this section as accurate vehicle information at your finger tips will prove to be invaluable. Very often identifying the correct part for you car can be all down to chassis or engine number. These details can best be found on the car itself, as registration documents can often prove to be incorrect due to engine swaps and vehicle upgrades that the DVLA have not been advised of.

UPGRADE
ELECTRONIC FUEL PUMP

This solid state, fully electronic version of the E-Type Fuel Pump has no points but looks identical to the original pump. A part which was once a common problem with the E-Type is now far more reliable and will last much longer than the points version.

PART NUMBER
AZX1405JU

See page 237 for full Fuel Pump listings.

POLYBUSH FRONT SUSPENSION KITS

Polybush polyurethane bushes improve the ride of your car by providing sharper cornering, excellent noise dampening, controlled suspension movement and reduced body roll, with unrivalled durability.

Polybush polyurethane Red Race Spec bushes, designed specifically for race/competition E-Types, improve the ride of your car by providing sharper cornering, controlled suspension movement and reduced body roll, with unrivalled durability.

Both kits contain anti-roll bar and upper/lower wishbone bushes to cover one car. All bushes are made in Polybush's comfort grade of polyurethane.

REAR DAMPERS, SPRINGS & RADIUS ARM (CONTINUED FROM PAGE 112)

ADJUSTABLE DAMPERS

GAZ and KONI dampers offer top of the range quality.
The GAZ dampers feature a 30-point on car rotary adjustment, dual piston seals and a zinc plated body for maximum resistance to corrosion. Every damper comes with a dynamometer report and a 3 year warranty.

PLATFORM ADJUSTABLE

Designed for the racing E-Type, these GAZ Adjustable platform dampers are the perfect complement to your E-Type. The adjustable platform aids the torsion bars and adds superb handling ability to the E-Type.

These dampers are not supplied with springs.

UPGRADE BRAKING...

SNG Barratt stocks a wide range of upgrades to enhance the braking performance of your E-Type. From uprated Pistons and grooved Brake Discs, all parts are manufactured and tested to the highest standards.

STAINLESS STEEL PISTONS

These pistons are composed entirely of high quality stainless steel and will not rust as originals do over time.

11365SS	FRONT OUTER
11366SS	FRONT INNER
11372SS	REAR

STAINLESS STEEL BRAKE HOSES

These uprated brake hoses will last longer on your E-Type and do not rust. Made from the highest quality stainless steel.

JLM9702SS/1	FRONT
NT606041J	NUT FOR ABOVE (2 REQUIRED)
C30754SS/1	REAR

GROOVED / DRILLED BRAKE DISCS

Grooved discs remove brake dust faster and more efficiently from the face of the disc, therefore improving the stopping power.

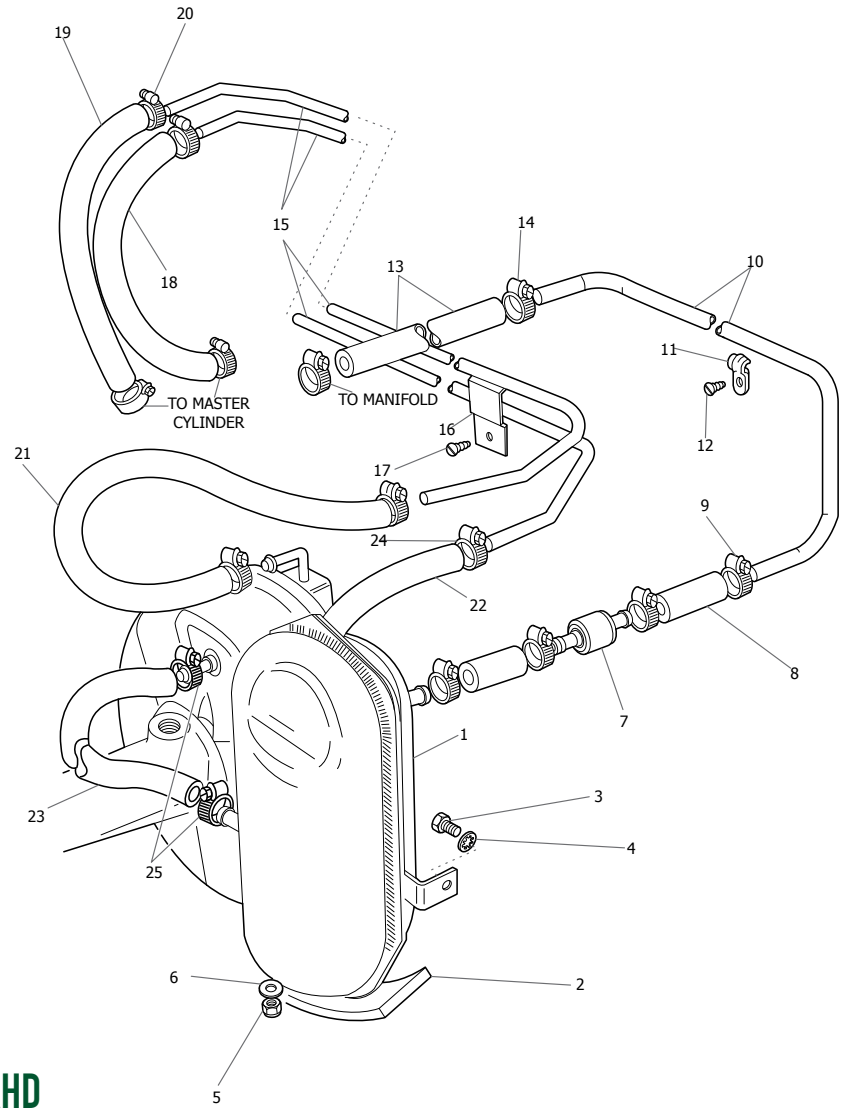

C32764TG	FRONT PAIR
C26779TG	REAR PAIR

Greenstuff & Blackstuff pads make use of the latest and best in friction technology, giving a significant improvement in the stopping power whilst causing no disc damage and minimal brake dust.

· GREENSTUFF FRONT BRAKE PADS	JLM9515U
· GREENSTUFF REAR BRAKE PADS	JLM1513U
· BLACKSTUFF HANDBRAKE PADS	JLM1514U

MINILITE WHEELS

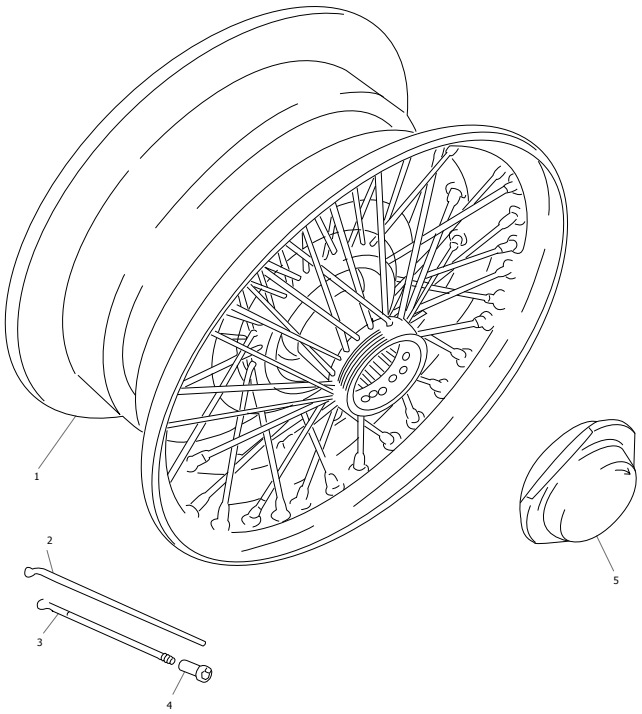

The iconic MINILITE wheel is now available through SNG Barratt. These wheels are 'low pressure' die cast in a high grade aluminium alloy which is machined on the latest CNC equipment and 100% pressure tested and powder coated for protection. With the authentic look of the 1960s and meeting all current regulations, these are ideal for getting that period appearance.

Dayton Wire Wheels are made by skilled craftsmen in the USA, and come with a comprehensive manufacturer's warranty.

The stainless steel spokes cannot rust, providing twice the fatigue resistance of the chrome plated equivalent. The spokes are also swaged, which gives them a smooth brilliant finish and provides an even distribution of stress. They are thicker at the hub and tapered to the rim. The centre locating hole is precisely machined to each vehicle's original wheel specification, allowing smooth running.

The individual parts are expertly polished, including both sides of the rims. Each wheel is hand-tightened and gauged for concentricity. Spokes are pre-loaded with even tension for durability and precise wheel alignment.

Periodic retrueing and retightening are not required.

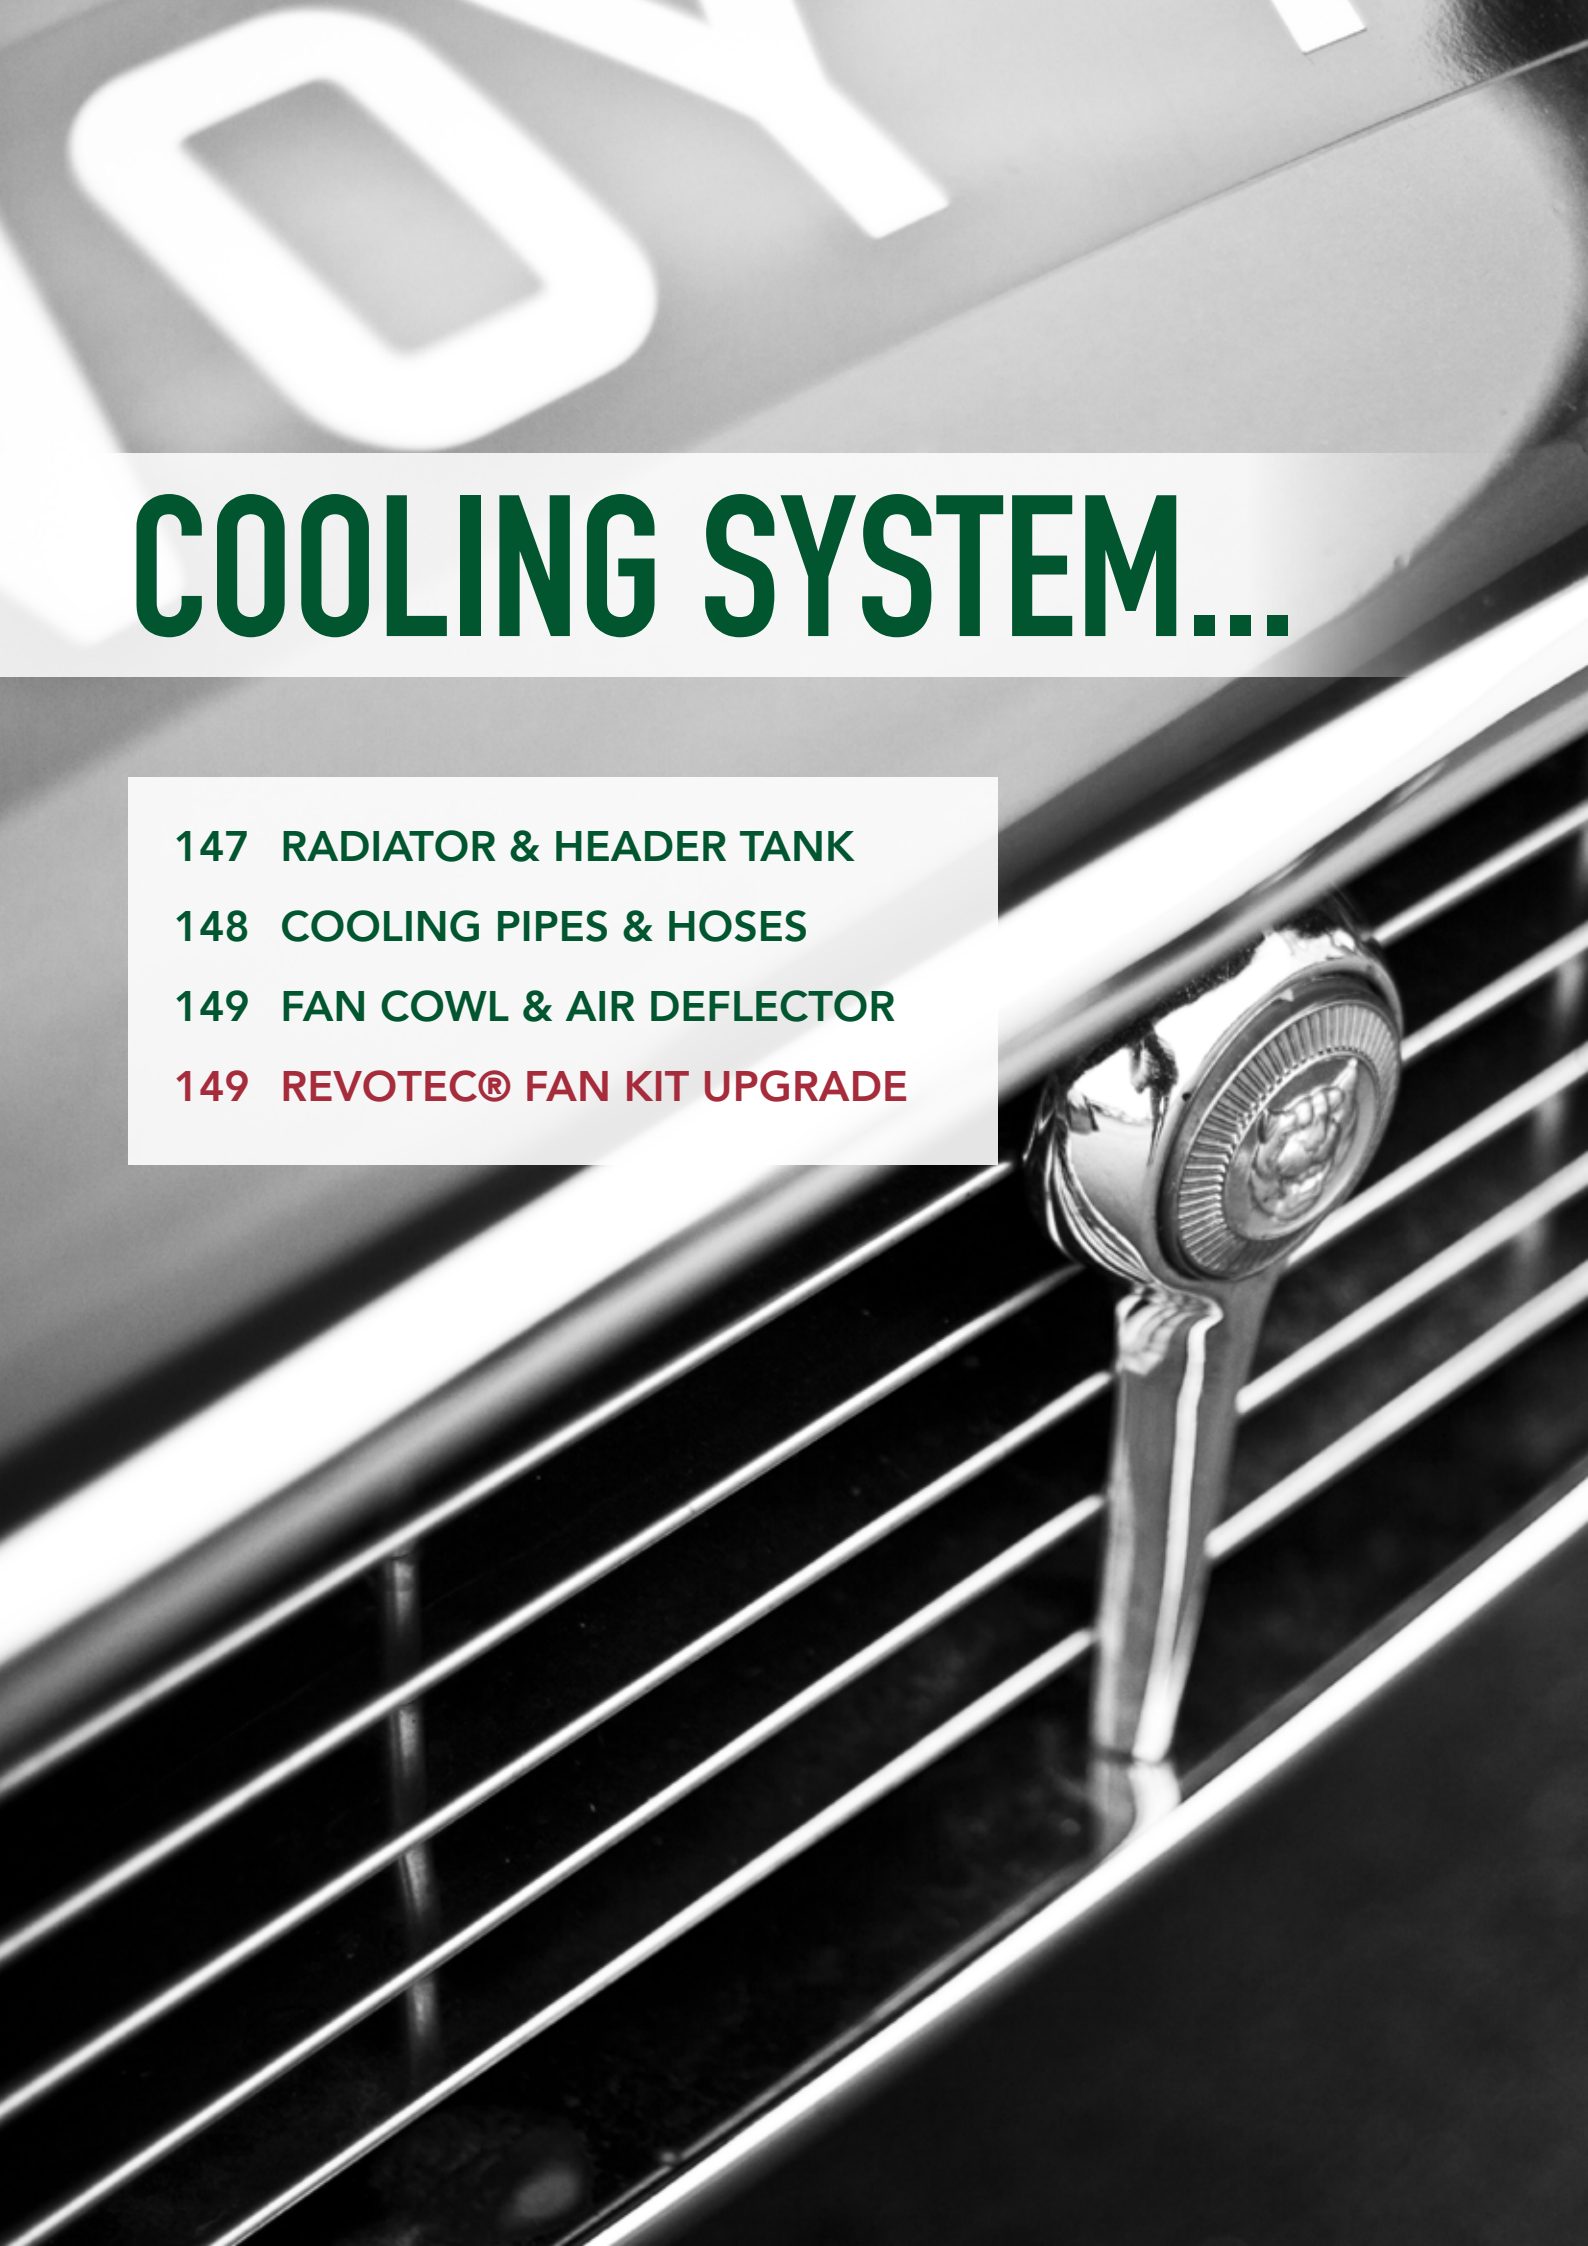

TUBELESS V12 DAYTON WIRE WHEEL

D493T · 15" x 6J

N.B. THE 'T' SUFFIX ON WIRE WHEELS DENOTES TUBELESS - NO NEED FOR AN INNER TUBE.

SILICONE HOSE KIT

Silicone hose kits are suitable for road and competition use. Their superior performance reduces the risk of component failure and enables higher temperatures and pressure to be maintained in complete confidence.

BELL

BRINGING YOU THE BEST

EXHAUSTS FOR YOUR E-TYPE

We are proud to supply Bell stainless steel exhaust systems for a wide range of Jaguar models.

These are British made and the finest quality. Every individual component is handmade by time served craftsmen to produce a system that is not only superior in its finished quality, but in the way it easily fits to your Jaguar. A lifetime guarantee that is valid for as long as you own the car ensures that you're bolting on total peace of mind whilst adding to your car's value.

UPGRADE ELECTRICAL...

With over four decades since the last E-Types were produced, technology has far surpassed that of the originally manufactured cars.

There are now a myriad of upgrades, replacements and uprated products available to bring your E-Type V12 up to date without losing the original appearance of the car.

UPRATED STARTER MOTOR

A lightweight and compact starter motor, with an adjustable plate which uses modern technology to offer over 200% more cranking power than original units.

EARLY MODELS	USM005/1
LATE MODELS	USM004/1

UPRATED ALTERNATOR KIT

A lightweight and self-regulating alternator, this part is more powerful than the original heavy Butec unit.

ALL V12	SBS1064/V

OPTRONIC IGNITION AMP

This kit ensures no permanent modification is required to your E-Type's distributor and fits within the distributor cap. Supplied complete with OEM components.

AMP	CEK150
FITTING KIT	FK119

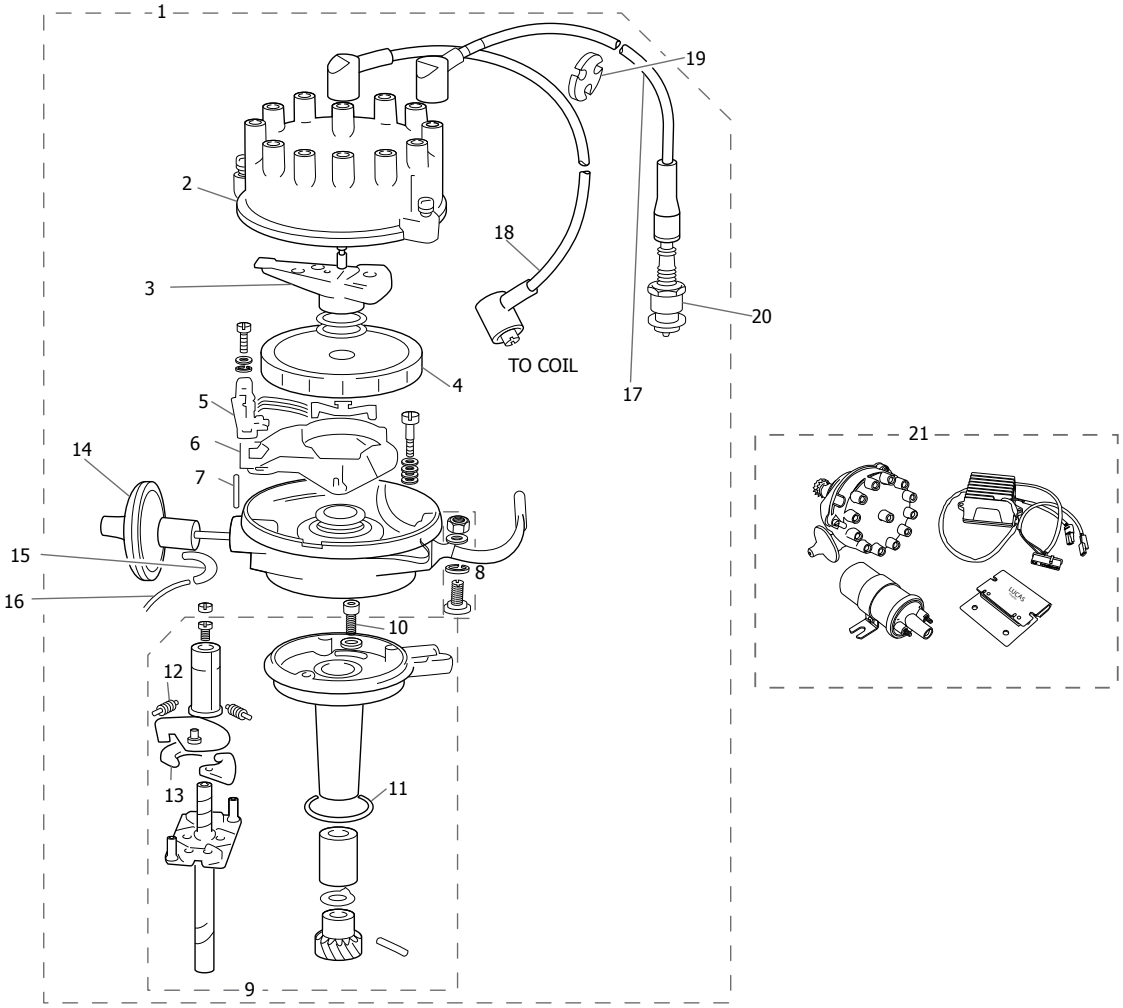

DAB DISTRIBUTOR CONVERSION

Developed and manufactured in house by SNG Barratt, this is a more modern approach to the original V12 Opus ignition system. See page for full details on this part.

CARBURETTOR	DAB113HE
FUEL INJECTION	DAB113HEF

DISTRIBUTOR ...DAB CONVERSION

Developed & Manufactured In-House

The Opus ignition system is fitted to the E-Type V12 as original equipment. For a while, we felt that this system was in need of a modern approach to improve reliability.

Our objective was to design and build a system into the original components, retaining the outward appearance of the original whilst making sure some clever things were going on behind the scenes!

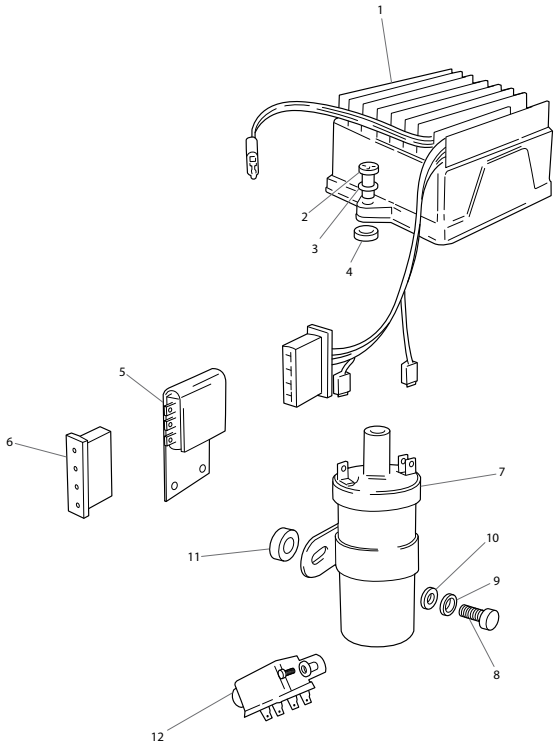

We began this task around ten years ago, trying out various processes and components to find the best results. The end product is something we are very proud of. We now manufacture and supply two versions of this kit; one for carburettor models and one for fuel injection E-Types.

PART NUMBER
DAB113HE

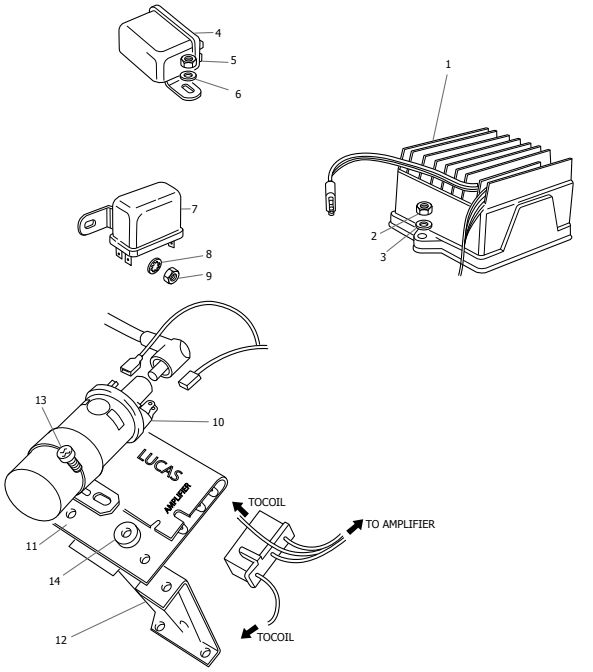

AMPLIFIER, BALLAST RESISTOR & COIL UP TO 7S.9678

1	Ignition Amplifier	C34781	1

HALOGEN HEADLAMP CONVERSION...

These retain the original look of the E-Type Headlamps, but are powered by a **H4 Halogen Bulb**, providing far better light during those night drives.

IMPERIAL KITS

Large bag of assorted nuts and bolts in imperial sizes. Useful as back up for a restoration project and ideal for overseas customers where imperial sized fasteners may be difficult to obtain.

SETSCREWS AND NUTS

100 setscrews, 75 plain & nyloc nuts & 75 washers in 1/4, 5/16 and 3/8 UNF — SBS1315

BOLTS AND NUTS

100 bolts, 75 plain & nyloc nuts & 75 washers in 1/4, 5/16 and 3/8 UNF — SBS1316
