INTRODUCTION

WELCOME

SNG Barratt first started to sell and remanufacture Jaguar E-Type components in the 1970's. With constant re-investment the range quickly grew and more and more items were re-introduced. Now many years later we make a multitude of parts for the entire range of classic Jaguars. This catalogue is designed purely with the X-Type owner in mind and offers a comprehensive range of the products that we can provide.

YOUR CUSTOMER NUMBER

Upon dealing with SNG Barratt for the first time you will be allocated a customer number. In most cases this will be your UK postcode or in the USA your telephone number. However if you are outside the UK/USA your sales advisor will use either your postal area code or a number devised using your surname. This customer number can either be found on your invoice or simply by asking the person serving you. The ability to provide your customer number when contacting our sales department will allow us to access your information far faster and serve you even more efficiently.

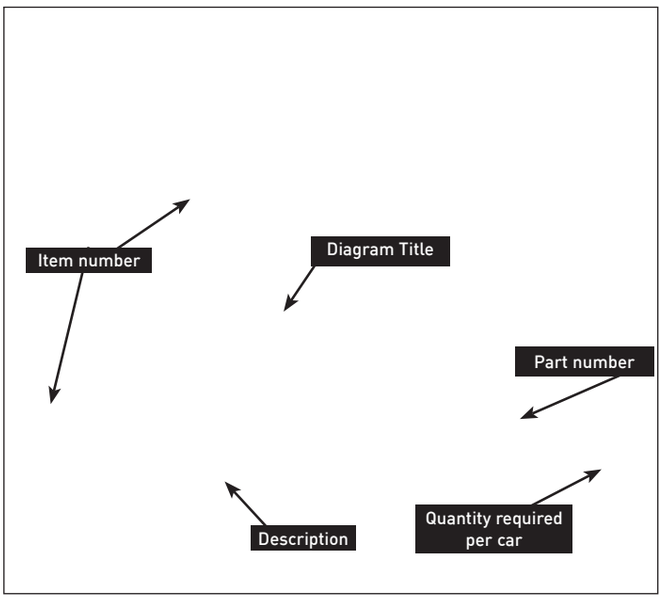
Customer Number: .....

HOW TO USE THIS CATALOGUE

Use the illustration in each section to identify the component that you require. Note the indicated item number and find the corresponding number in the section listing. There you will see our part number for that item, the description and to it's right the quantity required per car. Very often this will be the original Jaguar part number, thus allowing you to refer to an original factory parts catalogue if more detail is required.

If you then quote this part number when contacting our sales department or enter it into our website, we will be able to confirm the cost (all prices are also available online) and whether we have the part in stock.

If you cannot find or conclusively identify the item that you require then please call and we will aim to assist you. Whilst this catalogue is a comprehensive publication it is not a definitive guide to everything that we do. Our staff have many years of experience with all aspects of the Jaguar marque and may have just the answer...



We manufacture hundreds of Jaguar parts and have access to thousands more, for both classic and modern cars.

You can download your very own set of catalogues from our website at

www.sngbarratt.com

INTRODUCTION

THE JAGUAR X-TYPE

The X-Type was produced from 2001 until 2009 and was marketed in a saloon and estate variants, the X-Type Estate was the first estate car to manufactured in series production by Jaguar.

Codenamed X400 the X-Type was launched in October 2001, originally only a saloon model was available however in 2004 the estate model, known as the Sportwagon in the U.S.A, was added to the range. The car was initially only available with all-wheel-drive and the choice of a 2.5 or 3.0 litre V6, although in 2002 an entry-level 2.0 Litre V6 with front-wheel-drive was added. 2003 saw the introduction of a 2.0 litre diesel engine. All engines were available with either a 5-speed manual or a 5-speed automatic gearbox.

In 2007 the X-Type underwent a facelift, incorporating revised front and rear facias, new door mirrors with integrated indicators, a new 6-speed automatic gearbox with Jaguar Sequential Shift and also a 2.2 litre diesel engine.
Jaguar Land Rover announced that it would end production of the X-Type in 2009, over 360,000 X-Types were built during its production years, averaging 42,000 cars per year making it one of the most popular Jaguars ever built.

YOUR VEHICLE DETAILS

Please complete this section as accurate vehicle information at your finger tips will prove to be invaluable. Very often identifying the correct part for you car can be all down to chassis or engine number. These details can best be found on the car itself, as registration documents can often prove to be incorrect due to engine swaps and vehicle upgrades that the DVLA have not been advised of.

Year of manufacture: .....

Engine Size & Type: 2.0 Petrol / 2.5 Petrol / 3.0 Petrol / 2.0 Turbo Diesel / 2.2 Turbo Diesel

Gearbox: Automatic / Manual
